Introduction

In some cases, when a machine is first booted up, it will have incorrect settings in the BIOS for the order in which the devices boot up. This causes an error as the machine can't find the operating system to boot.

If this occurs, the following screen will appear:

```
Intel UNDI, PXE-2.1 (build 083)

Reboot and Select proper Boot device or Insert Boot Media in selected Boot device and press a key
```

Warning: Do Not Press a Key to start.

Reboot and Select proper Boot device or Insert Boot Media in selected Boot device and press a key

Fixing the Boot Order

To correct this error, the operator must fix the boot order in the BIOS.

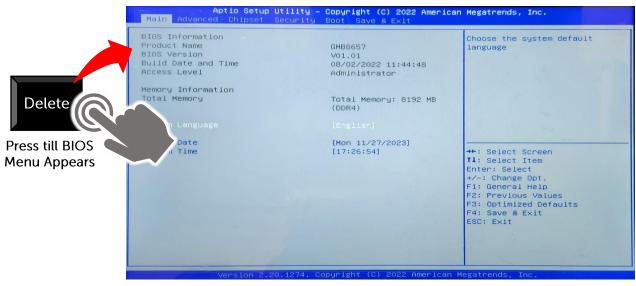

1. Connect a Keyboard to USB 2 on the Board.

2. Reboot the Machine.

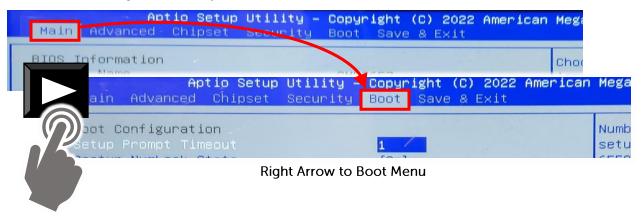

3. Once the Machine starts to Boot, **Begin Pressing** the **Delete** button on the Keyboard repeatedly until the BIOS Main Menu (Aptio Setup Utility) appears.

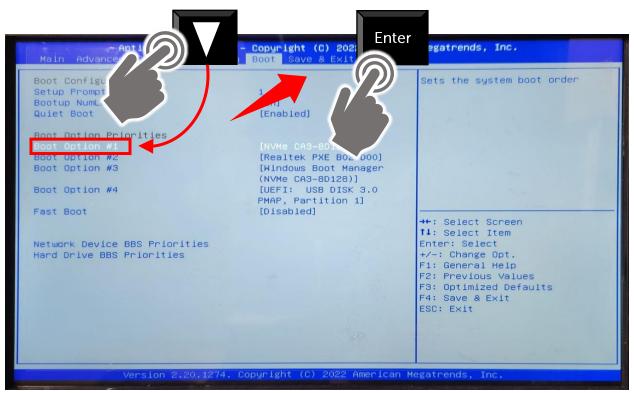

BIOS Menu

4. Use the Right Arrow key to Scroll to the Boot Menu.

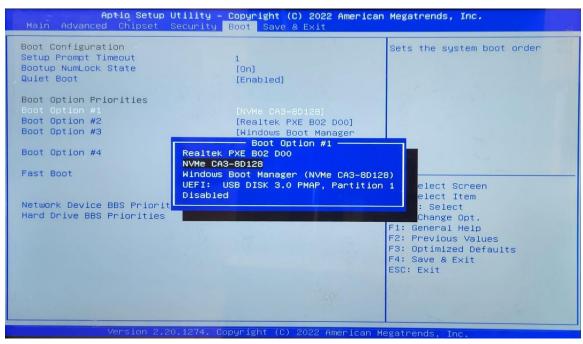

5. In the Boot Menu, use the Down Arrow to Highlight (in White) "Boot Option #1" and Press Enter to Select.

Down Arrow to "Boot Option #1" and Press Enter

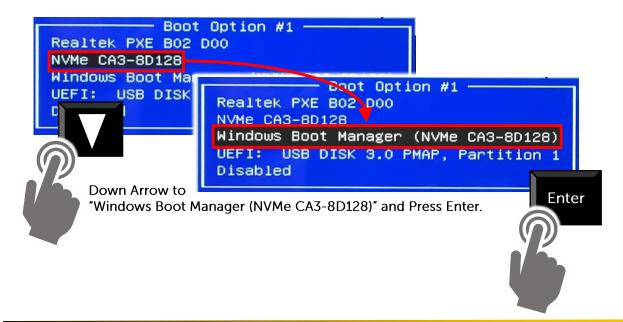

The Boot Option #1 Menu will appear.

j

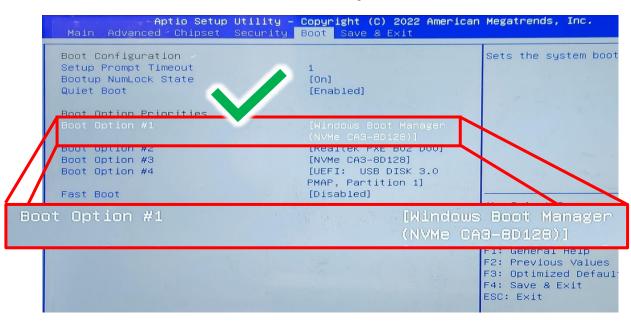

Note: The Default Selection is the "NVMe CA3-8D128" and this is incorrect.

6. Use the Down arrow to Select "Windows Boot Manager (NVMe CA3-8D128)" and Press Enter.

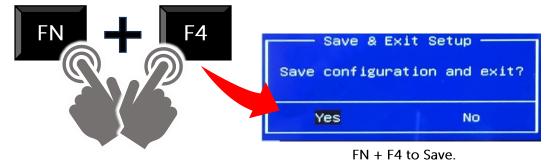

Boot Option #1 now shows "Windows Boot Manager (NVMe CA3-8D128)" is Selected.

7. Press the Function Key and F4 at the same time to open the Save and Exit dialog.

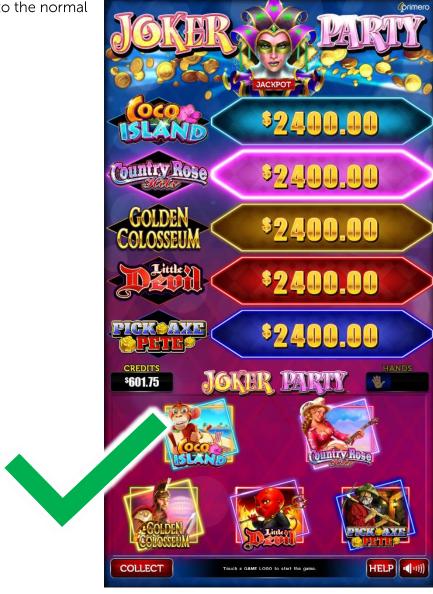

8. Press Enter to Save the setup and Exit.

The System should Reboot to the normal Game or Setup Mode.
